

Canon Pre-Owned Machine Program

For Refurbished imageRUNNER ADVANCE DX Devices

Refurbished imageRUNNER ADVANCE DX Models Available

- imageRUNNER ADVANCE DX 4700 Series
- imageRUNNER ADVANCE DX 6700 Series
- imageRUNNER ADVANCE DX C5700 Series

imageRUNNER ADVANCE DX C5760i

RESULTS

Reliable, cost-effective, refurbished equipment helps deliver the results you'd expect from Canon.

PACKAGE

Finished machines are packaged with white-glove care. They're wrapped in bubble wrap and corner boards to help prevent damage, and then shipped directly to dealerships nationwide.

QUALITY CONTROL CHECK

26-Point Inspection is performed by a Canon trained technician.

RECEIVE

Customers return off-lease devices to Canon Warehouses.

The Canon Refurbishment Process

CLEAN

Each device is cleaned inside and outside for that "like-new" appearance.

TEST

A Canon trained technician visually inspects, confirms copy quality, and checks the functionality of each imageRUNNER device.

REFURBISH

An initial triage and diagnostic service approach is taken:

- Major parts are replaced, if needed, including OEM developers, drums, and fixing
- Required modifications are installed; firmware is updated to the latest released version for that device.
- Firmware is updated to the lates version

Additional information can be obtained on the Partner Portal site. Please visit the BICG Marketing and Services site, and locate the "Pre-Owned Equipment" link from the homepage.
